
- **In future the set of circles represent a modular multithreaded client side system including customizable modular browser**
- **There is an unclear server-client boundary as model is in fact server-server**
- **Now the squares represent a corresponding modular multitasking server**
- **Supported by a new "WebUnix" or "WebNT" operating system optimized to support Web technology and interfaces. This is built in terms of modules WebOS.**
- **Users ONLY talk to Web Clients and Servers**
