

Vladimir Braverman is an Assistant Professor with the Department of Computer Science at the Johns Hopkins University. His main research interests are randomized and streaming algorithms. Braverman obtained his B.Sc. and M.Sc. degrees from Ben-Gurion University of the Negev, Israel, and his Ph.D. from UCLA in 2011. Prior to attending UCLA, Braverman has led a research team at HyperRoll, a startup company that has been acquired by Oracle in 2009. Braverman has received the Edward K. Rice Outstanding Doctoral Student Award, the Google Outstanding Graduate Student Research Award, Outstanding Ph.D. Graduate Award of the Computer Science Department, UCLA and the Google Faculty Award. His research is supported by the NSF and DARPA.
