

VIB is a non-profit research institute in the life sciences where more than 1000 scientists and technicians conduct strategic basic research. Through a close partnership with four Flemish universities and a solid funding program, VIB unites the forces of 65 excellent research groups. More info: www.vib.be

VIB Ph.D. Program

VIB International Ph.D. Program in the life sciences 2007

VIB is launching a new call for applications to its International Ph.D. Program.

VIB initiated its International Ph.D. Program in 2005. Each year, the program provides 4 candidates with financial support so that they can obtain a 4-year Ph.D. degree.

VIB offers challenging interdisciplinary research projects with individual guidance and support in a wide range of life sciences such as molecular biology, cell biology, developmental biology, structural biology, plant systems biology, genetics, biochemistry and microbiology.

VIB is located in Flanders, Belgium, in the centre of Europe, with easy access to other European countries. More than one third of all researchers have their roots outside Belgium, making VIB a vibrant international and intercultural community.

Deadline for application: 30th June 2007.

Project information and application forms are available at:
