TO WHOM IT MAY CONCERN:

Dr. Howard Van Woert has been working in my laboratory for the past 1 1/2 years preparing and testing catalysts for synthetic fuel applications. He is responsible and gets along well with everyone.

He has done a good job in his duties here. Howard is well-read and constantly searches the chemistry, physics and materials science literature for relevant information for our group's wide spectrum of research topics. This is his real strength, which has been further developed by a recent degree here in library science (M.Sc.). His best career choice may well be in library science. I have little evidence to suggest that he can devise and carry out a federally-funded research program. So for this information you will have to turn to other sources.

If I can be of further assistance, please don't hesitate to ask.

Sincerely,

A handwritten signature in cursive script that reads "Peter C. Eklund".

Peter C. Eklund
Professor of Physics
and Associate Director, CAER
