Lexington, January 5 of 1995

Dear Sir/Madam:

This letter is in support of Dr. Howard van Woert's application for a position in library science. I have known Dr. van Woert for over a year since he has worked under my supervision as a laboratory assistant in the synthesis and characterization of ceramic materials and novel catalysts. He conducts literature searches for our group and he keeps us up-to-date in the most current scientific developments relating to our research. Dr. van Woert is a very enthusiastic worker; he is very responsible and very meticulous in his work and does not get discouraged easily.

He has a pleasant personality, a bit eccentric but once you get to know him, you like him. In my opinion, because of his background in chemistry, he will be very helpful to researchers carrying out literature searches that require scientific knowledge and performing duties that demand computer skills.

Please don't hesitate to contact me if you need more information.

Sincerely,

Dr. Rosibel Ochoa  
Research Associate  
Center for Applied Energy Research
