April 18, 2006

Dear Ms Langlois

It's my pleasure to support the candidature of Dr. Shabir Hussain Qureshi for postdoctoral fellowship in your laboratory. I have known Shabir since the last ten years when he joined the Masters Program in Biochemistry in Hamdard University where I taught Immunology and Chemistry of Biomolecules courses to his class.

He did well in his masters and got first division marks. I have found him a very well behaved and hard working student.

Shabir has outstanding research potential with exemplary skills in generating and implementing ideas pertinent to the research problem. He has excellent analytical and communication skills, and will be an asset to any research establishment with the capability for both team and independent research work.

He has been able to learn a number of molecular biology, immunology and biochemical/biophysical techniques to carry out his research successfully.

As a person he is intelligent, hard working and well behaved. I am sure he will be an asset to your research group. I support his candidature for the postdoctoral position in your lab.

If you have any concern you may please contact me.

Dr. Zulfiqar Ahmad  
Research Assistant Professor  
Department of Biochemistry & Biophysics  
University of Rochester Medical Center,  
Rochester New York, 14642, USA
