Subject: Recommendation letter in favour of Ms. Neetu Dahiya for her Post Doctoral Programme

Dear Sir Hi

I am writing it in favour of Ms. Neetu Dahiya who has applied for the post doctoral programme under your guidance. I know her since Sept. 2001 when she contacted me for pursuing her Ph.D programme in Environmental Biotechnology but due to some administrative hurdles I guided her to complete her Ph.D with one of my friend Prof. R.P. Tewari, Dept of Biotechnology at Punjab University, Chandigarh. She has remained a brilliant student throughout her career and has proved this by getting positions at all level of study. She has acclaimed all which a good researcher in India is supposed to get like clearing of the CSIR Net and the GATE etc. She has a very health family environment from where she has learnt the basics of a good student as her all sisters are the scholars. I have found her a good team member with good temperament for pursuing the higher studies. She has great laboratory skills which I have tested by giving some of my project work. I have also gone through her Ph.D. thesis which clearly reflects her scientific creativity, critical thinking, familiarity with Scientific Literature and potential of an independent Researcher. I rank her 2 out of 5 point's scale that is out standing in majority of the points. I wish her success in all future endeavors.

With regards

Yours sincerely

(O.P.Ahlawat)
