

RECOMMENDATION LETTER

Ref: Hayk Davtyan

20.04.2006

Dear Dr. Lida Langlois,

I have known Hayk Davtyan since his employment in the Armenian Bone Marrow Donor registry Charitable Trust since July 2001. I am glad to use this opportunity to write a recommendation letter for him.

Hayk is a highly intelligent, perceptive young man. He was performing the DNA typing of our donors and leukemic patients in HLA laboratory applying her theoretical background in genetics. He has had training session in 2002 at Foundation Laboratories, Glendora, USA. During that training she was working with different PCR based techniques.

Always, in his work, Hayk is consistent, dedicated and passionate, enthusiastic, cheerful, and a pleasure to work with. He has incredible creative energies and a refreshing idealism tempered only enough to accomplish what needs to be done. His accountability ensures high efficiency of his work. If necessary, he can work on holiday and he is the first person to come to the lab in the morning and is the last one to leave in the evening. Hayk works well independently, but he is also a great team player. He is friendly, outgoing and willing to take on any task at hand.

I highly recommend him for any position of work, leadership, education, or any other capacity in which he can spread his excitement and share his talents with others.

Thank you once again for the opportunity to recommend such a special and impressive young man.

Sincerely,

Armenouhi Hyussyan
Laboratory Supervisor of ABMDR
