TO WHOMSOEVER IT MAY CONCERN

I know S. Viswanathan since 1998 as a research scholar in our Department. He completed his school education at Thiruthuraipoondi, Graduation and Post Graduations at Bharathidasan University, Tiruchirappali, INDIA.

He joined as Junior Research Fellow in an UGC sponsored research project in our Department and did Ph.D. under the Guidance of Dr. P.Manisankar. His thesis title is "Electrochemical Studies of Toxic Organics". He continued his research work in our Department as CSIR-SRF(extended in the field of environmental electrochemistry) and as Lecturer in the School of Chemical and Biotechnology, Shanmuga Arts, Science, Technology and Research Academy (A Deemed University) in Thanjavur, Tamilnadu, India. At present, he is doing research as post doctoral fellow in Department of Chemistry, National Tsing Hua university, Hsinchu, Taiwan.

He has published 12 research papers in International science journals and 2 in National journals. He has presented papers in 15 International and National conferences.

His professional skills are in the field of Biosensors, electrochemistry (cyclic voltammetry, stripping voltammetry, chronoamperometry, galvanostatic technique, modified electrode, etc). He is having experience in the electrochemical treatment process of dye, distillery and pesticide effluents.

He is sincere, dedicative and hard working person. Hence, I have strong recommendation to Dr.S.Viswanathan for postdoctoral fellowship at your university.
