Selection Grade Lecturer in Chemistry

I know Dr. S. Viswanathan from 2000, since then he is working as Research scholar with me. He completed his schooling in his native town, Thiruthuraiipoondi, Thiruvarur district, Tamilnadu, India. He graduated from Bharathidasan University, Thiruchirappalli, Tamilnadu, India in 1993 with first class. In the year 1995, he successfully completed his master degree in chemistry with first class from the same university. Then, he joined as JRF in the university grants commission (UGC), New Delhi sponsored research project. He completed his research work and submitted his Ph.D on October 2002 in chemistry, in the Department of Industrial chemistry, Alagappa University, Karaikudi. His thesis title was "Electrochemical studies of toxic organics". He completed successfully his public viva-voce examination on the thesis on 17th July 2004 and he was awarded his Ph.D degree from that day onwards. He continued his research work in the same department as Council of Scientific and Industrial Research (CSIR), New Delhi Senior Research fellow (SRF) extended in the field of Environmental chemistry. He has also worked as lecturer in chemistry in the School of Chemical and Biotechnology, Shanmuga Arts, Science, Technology and Research Academy (A Deemed University) in Thanjavur, Tamilnadu, India. At present he is doing his postdoctoral research in the Department of chemistry, National Tsing Hua University, Hsinchu, Taiwan.

He is a hard working person with good exposure in bioanalytical chemistry, immunosensors, electrochemistry and environmental chemistry. His professional skills include the operations of all electrochemical instruments, preparation of various modified electrodes and interpreting the results of electrochemical techniques. He has got outstanding experience in biosensors from his postdoctoral research in Taiwan. He has his credit published 12 research papers in international science journals and two national journals. He has presented his research work in 15 international and national conferences.

He is a native of Thiruthuraiipoondi, Tamilnadu, India and belonging to a respectable family. His father Mr. R.Subramanian is a teacher in a school and his mother Mrs.S.Jayalaksahmi is housewife. If he is given a chance in any research group, in my opinion, he will discharge his duties by working hard and satisfy the needs and expectation of his superiors. Hence I have strongly recommended Dr. S. Viswanathan for this post doctoral fellowship at your university.

Dr. A. Gomathi
