TO WHOM IT MAY CONCERN

I am glad to write the testimonial to Mr. Pawan Kumar Maurya who is known to me for last two years as a research scholar in the Department of Biochemistry of this university. He is enrolled for D.Phil degree in Biochemistry under Dr. S. I. Rizvi, Reader Department of Biochemistry. Mr. Pawan Kumar has been working on “Alteration in erythrocyte during aging in humans” for last over two years on this topic. During this period he has exercised several modern biochemical/molecular techniques. He has produced significant data on this line and they are in process of communication. He has also attended the conference of Association of Clinical Biochemists of India (ACBI).

Mr. Pawan Kumar has been an intelligent, diligent student of this department as he is evident from his certificate of merit at post graduation and other examination including CSIR-NET of 2004. Mr. Kumar is thoroughly gentle person with amicable behavior to his teachers and colleagues. I am sure that with these abilities he will be able to prove himself as asset to any academic / research organization where in he is offered to work.

I wish him good luck and success in all his future endeavors.

(Bechan Sharma)
