**TO WHOMEVER IT MAY CONCERN**

This is to certify that I Know Ms. M. Jayashri for Past five years as a researcher for the Ph.D. She underwent training in tissue culture, Immunological, molecular and virological techniques in my department. Her thesis on "Seroepidemiology of Dengue in Tamil Nadu and Immunological and molecular approach for rapid diagnosis" is well researched and executed. The project was funded by the prestigious Lady Tata Memorial Trust. Her experience in executing the project has enthused other co-workers to take up similar research on other viral diagnosis.

She was selected for National Polio Surveillance project as scientist engaged in isolation and identification of poliovirus in 1998. At present she holds the position of Senior Research Fellow – Indian Council of Medical Research. Her character and conduct is good.

I strongly recommend her for any Research and development Project. Given the opportunity she will raise up to the occasion.

(Dr.Nalini Ramamurty)
