**TO WHOMSOEVER IT MAY CONCERN**

I have known Dr. M. Jayashri for the last six years. She has been working at the department of Virology, King Institute of Preventive Medicine, Chennai. She spent sometime in our department in 1998 for hands on training for antigen preparation for dengue virus. This was towards carrying out her doctoral thesis work under the guidance of Dr. Nalini Ramamoorthy, Deputy Director, Head of department of Virology, King Institute of Preventive Medicine, Chennai.

She is hard working, diligent and has good laboratory skills. She got along well with her colleagues when at Vellore. She has reasonable skills in the *English language and can communicate clearly and fluently*. She is also a person of high integrity and *dedication*.

I wish her all success in her academic endeavours.

Prof. G. Sridharan.
