

I have seen your poster in sciencejobs.com. I applied for the post-doctoral position in your lab.

I have studied on molecular biology and inherit disease and developed a strong background of molecular biology, Ophthalmology, oncology and virology. I also have good experiences of experimental animal handling. Besides the broad knowledge of these fields, I have used a variety of related experimental techniques-which are listed in my CV. Based on my research, I have published several papers on these subjects.

The appendixe is my CV.

You can get recommendations for me from the follow scientists if you send e-mail or mail to them:
