

I am working as a Lecturer in the department of Biochemistry & Biotechnology, Faculty of Science, Annamalai University, India. I completed my Ph.D. degree in the same Department (awaiting viva-voce). I collected substantial research skill and teaching experience in Biochemistry, Biotechnology, Nutrition, Toxicology, Cytogenetics and Molecular biology.

I am a highly motivated and competent worker, who is hooked on learning, applying, and improving new methods in teaching and research. I prefer teamwork, but also can work as an individual. Although I have considerable experience in research and teaching, I am still open for further diversification.

I am now looking for a postdoctoral/teaching position in your established lab, which has proven record of research and teaching. I would be thankful to receive extensive training, which would improve my knowledge, skill and ability to carry out any independent task.

Please visit my resume profile for more detailed information.

I look forward to hearing from you.

Sincerely,

(N. RAJENDRA PRASAD)

Work Eligibility: No, I am not currently in possession of a US work permit.
