

I wish to bring to your kind notice that recently I have completed my viva-voce examination on my Ph.D thesis and currently I am working as a research scientist in a pharmaceutical industry with an assignment of synthesis and characterization of biologically active organic molecules. I have published five research papers at reputed international journals and three more research papers sent to different peer-reviewed journals on the topic of the research.

I would like to work in your esteemed lab as a postdoctoral fellow and I shall do my duties sincerely and efficiently with the fullest satisfaction of yours.

I am pleased to submit my CV along with the recommendation letter from my research guide to your kind perusal. I am ready to send the other documents after your reply.

Thanking you

yours sincerely

B. ARUL PRAKASAM
