

I am writing to you in regards to my application for a post doctoral position in your research Laboratory. I am deeply interested in this program and would like to convey my genuine interest to you.

Over the last 2 years I have been working in Dr. Hamid Band's laboratory at ENH Research Institute, Northwestern University, IL, USA. The major focus of our laboratory is to define the elements of cancer cell signaling and use these to develop targeted therapeutics and early diagnostic/prognostic markers in cancer.

I am interested in further pursuing my career in this field and am convinced that training under your guidance in your research laboratory will allow me to achieve that goal. My strong clinical background combined with my research skills gained during my Post doctoral fellowship gives me a unique edge over others. If given a chance to work in your esteemed organization, I shall contribute to the organization with my hard work, sincerity, teamwork and devotion.

I am attaching a copy of my CV with 4 references for your kind consideration. Please let me know if I can provide you with any further information. I look forward to hearing from you soon.

With Regards,

Sumeet Virmani, MD
Research Associate
ENH Research Institute
Division of Molecular Oncology,
Dept of Medicine
Evanston, IL-60201
USA.
Tel: 847 894 5099
