Dr. S. Niranjali Devaraj
Professor & Head

Dr.K. Anbarasi is known to me for the past 6 years. She joined the Department for her M.Phil and Ph.D degrees. Though she was not my student for her M.Phil and Ph.D degrees, I had several opportunities to interact with her during Departmental seminars and Doctoral committee meetings. She has impressed me as a researcher with innovative ideas.

Anbarasi's academic performance has been brilliant throughout. She has hands-on experience in various techniques like isolation of genomic and plasmid DNA, PCR, RT-PCR, Blotting techniques, ELISA and immunohistochemistry. She has 6 publications in peer-reviewed journals and has participated in several national and international conferences. She has attended 3 workshops and has gained experiences in isolating neuronal cells from rat brain, 2D gel electrophoresis, MALDI-TOF and confocal microscopy.

Anbarasi is a person with admirable character. I strongly recommend her for a post-doctoral position in your laboratory.

S. Niranjali Devaraj
