G. Jayaraman, Ph.D
Reader & Co-ordinator
Molecular Biology Programme

30.11.2005

To whom it may concern

It gives me a great pleasure to write about Dr. K. Anbarasi. I have known her since 2000. After completing her B.Sc. degree she joined our university for the masters and doctoral programs in Biochemistry.

Dr. Anbarasi is a brilliant student. I have found her to be very dedicated to studies. She is an untiring workert with great perseverance and determination. Also, she is an able teacher. Her seminars were always of high standard.

She possesses a pleasing personality and gets along well with colleagues and superiors. Her bench work has always been neat and the data generated by her are reliable. She is well versed with biochemistry and cell & molecular biology work including PCR techniques, gene cloning etc. She is good at independently designing experiments and executing them.

She will be an excellent asset as a post-doctoral researcher in any leading Institute / laboratory involved in active research and teaching in cell & molecular biology/biochemistry/biotechnology. Therefore, I recommend her application with great enthusiasm.
