

Dear Ms. Higgins:

I have been asked to provide a letter of recommendation to you concerning Dr. Flaubert Mbeunkui. Flaubert has worked as a postdoc in Dr. Lewis Pannel's Proteomics and Mass Spectrometry laboratory at the University of South Alabama Mitchell Cancer Institute (USA MCI). He has not worked directly for me but has worked in space adjacent to my lab and attends the MCI research-in-progress meetings every week. I think he is well read, gets along well with the postdocs in other labs, and seems to work hard. Unfortunately I cannot comment on the quality or quantity of his work as I do not interact with him on that level. However, he seems to know his materials well during research presentation. He is likeable and is usually working in the lab whenever I come by.

Hung T. Khong, M.D.
