EDUCATION

Sept. 2003 to present: PhD student, College of Life Science, Northeast Agricultural University, Major: Embryo development and implantation
Supervisor: Professor Zeng-Ming Yang (SSR Membership)

Sept. 2000 to June 2003: Master student, College of Life Science, Northeast Agricultural University, Major: Embryo development and implantation
Supervisor: Professor Zeng-Ming Yang

Sept. 1996 to June 2000: Bachelor of Science, College of Life Sciences, Northeast Agricultural University Major: Biotechnology.

TECHNICAL SKILLS: Molecular cloning, RT-PCR, in situ hybridization, immunohistochemistry, western blot, northern blot, embryo culture and cell culture, transfection.

Research Experience:

1999-2000 (1) Calcitonin immunostaining in monkey uterus during menstrual cycle and early pregnancy.

(2) Basigin expression and hormonal regulation in the rat uterus during the peri-implantation period.

2000-2003 (1) Signal transducer and activator of transcription 3 (Stat3), in rat and mouse implantation and decidualization.

(2) Peroxisome proliferator-activated receptor delta (PPARdelta) in rat implantation and decidualization.

(3) Cyclooxygenases and prostaglandin E synthases in the endometrium of the rhesus monkey during the menstrual cycle.

(4) EP2 in rat uterus during early pregnancy.

- 2003-2006**
- (1) Nimesulide (COX-2 inhibitor) effect on rat ovulation implantation and decidualization.
 - (2) Prostaglandin E synthases in rat embryo implantation and decidualization.
 - (3) Prostaglandin E synthases in mouse ovary during sexual maturation and luteal development
 - (4) Effect of gonadotropins on mouse implantation and decidualization.
 - (5) Ndrg1 in mouse implantation and decidualization.
 - (6) Androgen activity and signal transduction in mouse embryo implantation and decidualization.

CURRENT RESEARCH ACTIVITIES

I am a doctoral student of Prof. Yang Zeng-Ming in the Lab of Molecular Reproduction and Development, Northeast Agricultural University, Harbin, China. My current research focuses on the expression, regulation and function of implantation-related molecules in mouse uterus during early pregnancy. Pseudopregnancy, delayed implantation, steroid hormone treatment, artificial decidualization and culture of mouse uterine cells are used in my projects. I am familiar with *in situ* hybridization, immunohistochemistry, Western Blot and semi-quantitative RT-PCR. Additionally, I am familiar with mouse and rat surgical techniques, like ovariectomy, castration, oviduct/vas ligation, embryo transfer, and intrauterine injection.
