To:glazier@indiana.edu, "Curry, Errissa M" <ercurry@indiana.edu>

Dear James,

The moment you announced the new positions I thought of Greg - he is much better than his current job deserves, he had to get anything in Boston so his wife could work at the Boston public TV station, but she does not do that any more and is now movable.

Greg is very creative and inventive, and knows tons of good physics and mathematics. He is also a wonderful teacher, and can get himself funded even in purely teaching mini-physics department, with the teaching load that he lugs. I am currently 564 emails in the hole, so the letter has not been written yet, but if you need it urgently, please let me know.

All the best, and good luck with the great new project!
Predrag
