Mahadevappa Mahesh, Ph.D., DABR  
Chief Clinical Radiology Physicist

May 15<sup>th</sup>, 2003

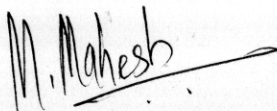

To Whom It May Concern:

I am writing this letter on behalf of Dr Michael A. Ibrahim, who was my colleague in graduate studies at Medical College of Wisconsin, Milwaukee, WI. I have known him for more than twelve years and with pleasure I am writing this letter of recommendation who is seeking a faculty position for teaching and research in the area of biophysics and medical imaging.

I have followed his research during the graduate school in the area of magnetic resonance imaging. He has a number of publications and has done significant work in the area of dynamic MR imaging with contrast agents. Throughout his graduate school, Michael has work hard to excel in his field of interest. With medical school background he had significant experience in the field of clinical science, which was a added bonus for his research. On a personal note, I am happy to have known Michael, who is not only hardworking but also very friendly. He is very knowledgeable in his field.

Thanking You.

Sincerely Yours,

Mahadevappa Mahesh, M.S., Ph.D.  
Chief Physicist and Instructor  
Johns Hopkins University
