

Curriculum Vitae

Hugh Nymeyer

Theoretical Biology & Biophysics Group
Los Alamos National Laboratory
MS K710, T-10
Los Alamos, NM 87545

Telephone: (505) 660-5171

Fax: (505) 665-3493

E-mail: hugh@lanl.gov

Education:

- Ph.D. In physics from the University of California, San Diego, CA, 2001. Thesis entitled *Computational Studies of Protein Folding* under the supervision of Prof. José N. Onuchic.
- B.S. In physics & mathematics from Calvin College, Grand Rapids, MI, 1994.

Employment/Professional Experience:

- 2001 – present Directors Funded Post-doctoral Fellow, Los Alamos National Laboratory.
- 1996 – 2001 Research Assistant at the University of California, San Diego.
- 1994 – 1996 Teaching Assistant at the University of California, San Diego.
- 1993 – 1994 Summer Research Assistant at Calvin College, Grand Rapids, MI.

Current Interests:

I am currently interested in the development of enhanced sampling methods and their application to simulations of biological systems. Most enhanced sampling methods have been developed to circumvent the critical slowing down seen at discontinuous phase transitions or in glassy systems. Many biological systems exhibit both these features. For example, the globular proteins have cooperative folding/unfolding transitions as well as frustrated interactions and large enthalpic barriers, which produce a broad range of relaxation times. I am currently involved in using enhanced sampling methods to study the enthalpic and entropic forces guiding protein folding, the use of reduced coordinates to describe folding transitions, structural changes in lipid bilayers, and the interactions of peptides with lipid bilayers.

Publications:

Hugh Nymeyer & Angel E. García, **Replica exchange calculations of the TRPcage protein in explicit solvent**, *In preparation*.
