Product Information:

MISCELLANEOUS: Please enquire for pricing and information on the following options:

- Seating & Benches
- Solid Cedar T & G panels
- Stairs and Skirting

Materials

Gazebos are constructed from a premium grade of western red cedar, hand selected for grain and color and free of loose or open knots. Non-corrosive plated hardware is included on all products.

Foundation

A level and secure base is required for the assembly of all sizes of structures. The simplest method is to use patio stones. Alternatively, concrete footings or superspikes may also be used. If you plan to mount the structure on a concrete slab, a floor is not required. Please contact us and we will supply you with drawings and instructions to assist you in preparing your site.

Finishing

Left alone, cedar will age to a beautiful silver finish. Alternatively, you may wish to stain your structure to match the surrounding architecture or landscape. Our gazebos are ideally suited for clear or semi-transparent finishes which accentuate the dramatic grain and rich hues of the cedar.

Assembly

Labelled components, explicit instructions, an installation video, online guide and a toll free customer assistance line help to ensure an easy installation (usually in one to two days). If 'do it yourself' is not for you, a 'hiring a contractor' package is included with the instructions to assist you.

Drawings & Permits

In most jurisdictions, building permits are not required on structures under 100 sq. ft. All Summerwood structures exceeding 100 sq. ft. are manufactured to conform to most regional building codes. If you require permit drawings and specifications, for a minimal fee of \$200, we will be pleased to provide them for you at the time of order.

Pertinent Details:

Ordering Procedure & Payment

For ordering procedure, payment and shipping details or warranty information; please review the 'Pertinent Details' section on the accompanying Cabanas and Sheds price list or order online at www.summerwood.com.

All prices in U.S. dollars.

PRICE LIST

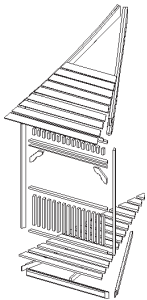

Summerwood gazebos are engineered to the highest standards of quality and craftsmanship. Our choice for materials is western red cedar, one of the world's most highly prized woods. Recognizable by its fine grain, warm reddish tones, and pleasant and familiar fragrance, cedar is the preferred choice where aesthetic appeal, durability, and weather resistance are important.

Formats

Most of our gazebos are available in three convenient formats:

①

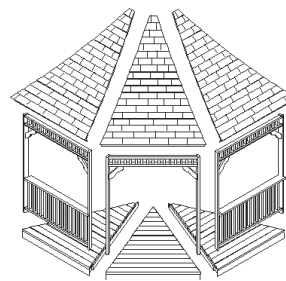

PRE-CUT KIT

- All components are pre-cut and ready to assemble
 - Includes explicit instructions and all required hardware
 - Securely packaged for convenient shipping
 - Ideal do-it-yourself project
- Due to style preferences and weight consideration, shingles are not included with the pre-cut kit.*

②

PRE-ASSEMBLED KIT

- All sections of the kit are pre-assembled, and the roof panels are pre-shingled (ie: 8 floor sections, 8 wall sections, 8 roof sections)
- Easily installed in usually just one day
- Due to size constraints, roof panels on sizes of 18ft. and larger are not pre-fabricated.

An instructional video is included with all orders to assist in the installation of your structure. You may also order a copy for \$19.95 if you wish to have more information before purchasing (*credited towards purchase*).

Pricing

Applicable taxes and freight extra.
