Table of Contents

1 perl - Practical Extraction and Report Language
5 perldata - Perl data types
13 perlsyn - Perl syntax
21 perlop - Perl operators and precedence
38 perlre - Perl regular expressions
43 perlrun - how to execute the Perl interpreter
48 perlfunc - Perl builtin functions
94 perlvar - Perl predefined variables
102 perlsub - Perl subroutines
114 perlmod - Perl modules (packages)
127 perlref - Perl references and nested data structures
134 perldsc - Perl Data Structures Cookbook
148 perlLoL - Manipulating Lists of Lists in Perl
153 perlobj - Perl objects
159 perltie - how to hide an object class in a simple variable
169 perlbot - Bag'o Object Tricks (the BOT)
178 perldebug - Perl debugging
181 perldiag - various Perl diagnostics
209 perlform - Perl formats
214 perlipc - Perl interprocess communication (signals, fifos, pipes, safe subprocceses, sockets, and semaphores)
229 perlsec - Perl security
232 perltrap - Perl traps for the unwary
237 perlstyle - Perl style guide
240 perlxs - XS language reference manual
253 perlXStut - Tutorial for XSUB's
261 perlguts - Perl's Internal Functions
291 perlcall - Perl calling conventions from C
318 perlembed - how to embed perl in your C program
329 perlpod - plain old documentation
332 subs - Perl pragma to predeclare sub names
333 strict - Perl pragma to restrict unsafe constructs
334 sigtrap - Perl pragma to enable stack backtrace on unexpected signals
335 overload - Package for overloading perl operations
341 lib - manipulate @INC at compile time
343 less - perl pragma to request less of something from the compiler
344 integer - Perl pragma to compute arithmetic in integer instead of double
345 diagnostics - Perl compiler pragma to force verbose warning diagnostics
348 AnyDBM_File - provide framework for multiple DBMs
350 AutoLoader - load functions only on demand
351 AutoSplit - split a package for autoloading
352 Benchmark - benchmark running times of code
354 carp - warn of errors (from perspective of caller)
355 Config - access Perl configuration option
356 getcwd - get pathname of current working directory
357 DB_File - Perl5 access to Berkeley DB
363 Devel::SelfStubber - generate stubs for a SelfLoading module
364 DynaLoader - Dynamically load C libraries into Perl code
368 English - use nice English (or awk) names for ugly punctuation variables
369 Env - perl module that imports environment variables
370 Exporter - provide inport/export controls for Perl modules
371 ExtUtils::Liblist - determine libraries to use and how to use them
372 ExtUtils::MakeMaker - create an extension Makefile
384 ExtUtils::Manifest - utilities to write and check a MANIFEST file
387 Mkbootstrap - make a bootstrap file for use by DynaLoader

Table of Contents

388 Fcntl - load the C Fcntl.h defines
389 Basename - parse file specifications
391 validate - run many filetest checks on a tree
392 find - traverse a file tree
393 File::Path - create or remove a series of directories
394 FileHandle - supply object methods for filehandles
396 GetOptions - extended getopt processing
398 getopt - Process single-character switches with switch clustering
399 Collate - compare 8-bit scalar data according to the current locale
400 IPC::Open2, open2 - open a process for both reading and writing
401 IPC::Open3, open3 - open a process for reading, writing, and error handling
402 Net::Ping, pingecho - check a host for upness
403 POSIX - Perl interface to IEEE Std 1003.1
421 Safe - Safe extension module for Perl
424 SelfLoader - load functions only on demand
427 Socket, sockaddr_in, sockaddr_un, inet_aton, inet_ntoa - load the C socket.h defines and structure manipulators
429 Sys::Hostname - Try every conceivable way to get hostname
430 Term::Cap - Perl termcap interface
432 Term::Complete - Perl word completion module
433 Test::Harness - run perl standard test scripts with statistics
434 abbrev - create an abbreviation table from a list
435 Text::Soundex - Implementation of the Soundex Algorithm as Described by Knuth
439 TieHash, TieHash::Std - base class definitions for tied hashes
441 Time::Local - efficiently compute tome from local and GMT time
