What's New What's Cool Handbook Net Search Net Directory Software

This page allows a user to insert a new BoM document with required attributes and indexes into the database so that other users can search and access. Upon the entering of a new document into the DB, the infomation will be validated to make sure data consisency and other criteria required by a relational database management system. If invalid data entry is found, the user will be requested to re-enter the entry. If all data are correct, the new information will be inserted and are immediately available to other users to share. The data items used here are fake data for demo only. In actual situation, more complex data structure and data entry requirement are expected.

Insert a new BoM document
