Rome Laboratory

Rome Laboratory at Griffiss Air Force Base, N.Y., is the **Air Force Materiel Command (AFMC)** center of excellence for **Command, Control, Communications and Intelligence (C3I)** research and development. Rome Lab develops techniques and equipment for the surveillance of ground and aerospace objects, and for inter-theater and intra-theater survivable communications. Rome Lab is also the Air Force center of expertise for the development of technologies for battle management information systems and the handling of intelligence data. Engineers and scientists at the laboratory are also involved in the following technologies: software engineering, artificial intelligence/expert systems, solid state sciences and materials, electromagnetics, photonics, signal processing, computer architectures, reliability, maintainability and compatibility of electronic systems.

- **Mission**
- **Commander**
- **Organization**
- **Technology Program and Facilities**
- **Advanced Technology Data Sheets**
- **World Wide Web Server**
