Humblest apologies.

I hope some of the following will help:

XML: To get links to both the established W3C recommendation and the plan
for the ongoing work in progress start at <http://www.w3.org/XML/>.

DOM: Same statement with XML --> DOM, viz: <http://www.w3.org/DOM/>.

WAI: The Web Content Accessibility Guidelines are a recent accomplishment
but the work is expanding and continuing and so once again the place to
start is <http://www.w3.org/WAI/>.

XMI: Interesting candidate schema approach for XML from OMG. Start at
<http://www.omg.org/cgi-bin/doc?ad/98-10-05>.

IMS: Instructional Management System. Standards proposal development in
process.
Start at <http:/www.imsproject.org>.

Hybrid Control Theory of Kohn and Nerode. (see my bio for relevance) Start
for example at

Theoretical Computer Science, Volume 138
<http://ftp.ust.hk/dblp/db/journals/tcs/tcs138.html#KohnNRY95>

For my contributions on the human side of telecollaboration check out the
acknowledgements in _Virtual Teams_ by Lipnack and Stamps. One can pick up
the trail at

Virtual Team WebBook
<http://www.netage.com/VT/VT_WebBook/webbk_top.html>

I doubt this is anything like the format NSF wants. However, at least for
the W3C documents the URI is _the preferred_ way to refer to the document.

Al

Again, sorry this is not better prepared.
