

WEATHERMAKER® - 38TXA WITH PURON™ REFRIGERANT

Central Air Conditioning

13.0 SEER WITH PURON ENVIRONMENTALLY SOUND REFRIGERANT

The WeatherMaker® 38TXA is Carrier's environmentally sound central air conditioner with Puron™ refrigerant.

leadership

Carrier created the concept of indoor weather with the first residential air conditioner and we continue leading the industry by developing the first full line of air conditioners to use a chlorine-free refrigerant that's easy on the environment. As environmental requirements change, industries are phasing out old refrigerants. The automotive industry has already converted the air conditioning systems in automobiles to use a chlorine-free refrigerant. That's why Carrier designed the WeatherMaker 38TXA to use Puron refrigerant. This technological breakthrough has been awarded the Green Seal of Approval from a national not-for-profit agency.

As an ENERGY STAR Partner™ Carrier Corporation has determined that this product meets the ENERGY STAR guidelines for energy efficiency.

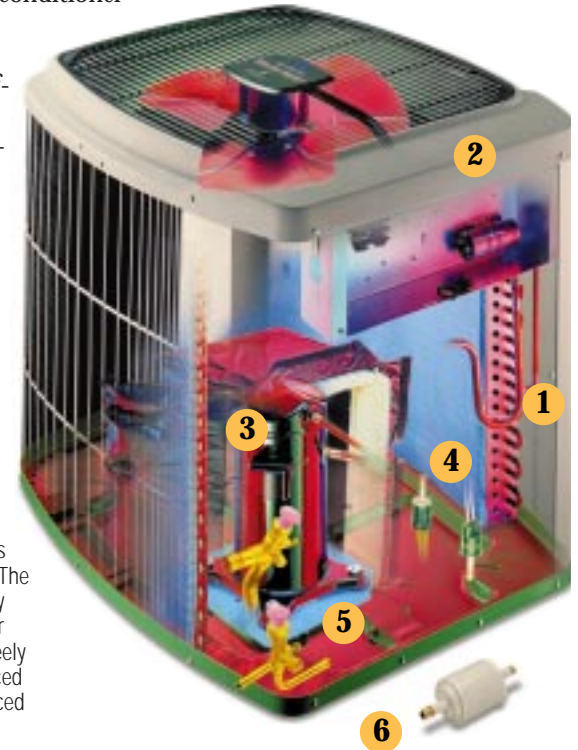

Carrier's technologically-advanced design and use of Puron, the environmentally sound refrigerant, have earned the Green Seal of Approval.

performance

technology

The WeatherMaker 38TXA's efficient use of energy, environmentally sound operation and advanced technology all contribute to its solid performance. Each component of the WeatherMaker 38TXA air conditioner is designed to provide optimum efficiency, comfort and reliability. This state-of-the-art cooling machine delivers the ultimate in custom made indoor weather summer after summer.

- 1 **Environmentally sound refrigerant, Puron**, inside the system. As the refrigerant of the future, Puron will deliver cool comfort and energy-savings performance.
- 2 **Quiet, economical performance** of the outdoor unit is the result of Carrier's exclusive Silencer System. The combination of our uniquely designed top and fan motor allows air to travel more freely through the unit for enhanced energy efficiency and reduced sound levels.
- 3 **Efficient, reliable performance** of the scroll compressor provides long-lasting, energy efficient comfort year after year.
- 4 **Consistent operation** is ensured by the high-and-low pressure switches that protect the compressor from extreme conditions.
- 5 **As part of the quietest family of air conditioners in the industry, reduced sound** is the result of our compressor vibration isolator plate. Preventing vibration from transmitting into the base pan helps minimize operational sound.

- 6 **For added reliability**, the filter drier prevents the formation of acids that can cause corrosion in the system.

Carrier's WeatherMaker 38TXA air conditioner is a smart investment in custom made indoor weather for both now and the future. As one of the most efficient single-speed air conditioners in Carrier's entire product line, the WeatherMaker 38TXA air conditioner keeps you cool with up to 14.0 SEER (Seasonal Energy Efficiency Ratio) efficiency. The exceptional ratings of this air conditioner meet the EPA Energy Star guidelines for energy-efficient performance. In addition, this air conditioner meets future environmental requirements so you can avoid the potentially high cost of service.
