

ENVIRONMENTALLY SOUND – FX4A

Fan Coil

COMFORT AND EFFICIENCY FOR YEARS TO COME

Improve your indoor weather and energy efficiency with a fan coil from Carrier.

leadership

Carrier's FX4A fan coil is designed to improve the performance and efficiency of your indoor weather system while preserving the environment with a chlorine-free refrigerant. Carrier has been designing, testing and marketing air conditioners, heat pumps and fan coils, such as the FX4A, that use Puron, an environmentally sound refrigerant. Carrier's leadership enables you to enjoy the comfort and efficiency of future technology today, and for many years to follow.

efficiency

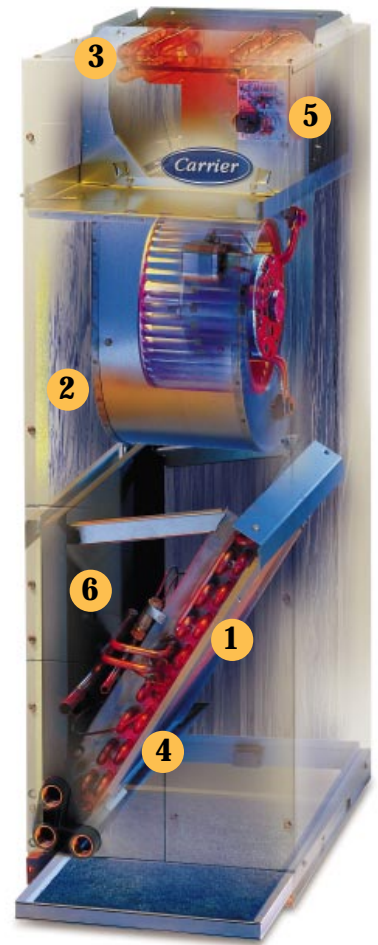

The FX4A fan coil enhances the efficiency of your indoor weather system in two ways. First, Puron refrigerant is more efficient than traditional refrigerants. Second, the FX4A features a thermostatic expansion valve (TXV) which measures refrigerant usage to provide precision heating control during the winter season. As a result, you can enjoy year-round control over the cost of your indoor comfort.

performance

Carrier's advanced technology is combined with proven components to provide superior performance and reliability. The enhanced drain pan and foil-faced insulation inhibit mold, mildew and bacterial growth for improved indoor air quality. The electronic control board reliably enhances system operation for your comfort and convenience. Each component of the FX4A is designed to maximize the performance of your indoor weather system. Ask your Indoor Weather Expert, your local Carrier dealer, how you can customize your system for added comfort, efficiency and environmental sensitivity.

benefits & features

- 1 Environmental sensitivity and energy efficiency** are two of the many advantages of Carrier's Puron refrigerant.
- 2 Quiet comfort for you and your family** is one of the benefits of our foil-faced insulation. This insulation also inhibits bacteria growth and is easy to clean for improved indoor air quality.
- 3 Warm, winter comfort with optional electric resistance heat** allows you to enjoy the comfort of your home even on the coldest winter days.
- 4 Efficient operation** translates into saving electricity, thanks to details like our rifled copper tubing and louvered fins. These design elements maximize the performance of your indoor weather system.
- 5 Reliable operation** of the electronic control board means all you have to do is set the thermostat and let the system do the rest.
- 6 Improved indoor air quality** is the result of the enhanced drain pan designed for superior drainage of condensate. This drain reduces the chances of mold, mildew and corrosion.

Carrier's technologically-advanced design and use of Puron, the environmentally sound refrigerant, has earned the Green Seal of Approval.

As an ENERGY STAR Partner™ Carrier Corporation has determined that this product meets the ENERGY STAR guidelines for energy efficiency.

WARRANTY

You can enjoy custom made indoor weather without worrying about your system because Carrier backs all of its products in writing. The FX4A fan coil is protected by a one-year limited warranty. Extended warranties are also available. Ask your indoor weather expert for details.
