

WEATHERMAKER® 38YXA WITH PURON™ REFRIGERANT

# Heat Pump

YEAR-ROUND COMFORT AT 13.0 SEER AND 8.0 HSPF

# Invest in your future with Carrier's WeatherMaker® 38YXA heat pump with Puron™ refrigerant.

leadership

Carrier's WeatherMaker 38YXA with Puron refrigerant is the first heat pump that delivers energy-efficient, environmentally sound indoor weather throughout every season. Designed to use the chlorine-free refrigerant Puron, Carrier's WeatherMaker 38YXA is the technology of the future. As environmental requirements change, the heating and cooling industry must phase out existing refrigerants. Eventually, the supply of these existing refrigerants will be restricted, making the units that use them substantially more expensive to service. That's why, since 1996, Carrier has been designing, building and perfecting new technology that uses Puron, a technologically advanced refrigerant that meets the approval of the Environmental Protection Agency. In fact, products with the Puron refrigerant have been awarded the Green Seal of Approval by a national agency.

technology

Carrier's Puron-based products have earned the Green Seal of Approval from a national agency.

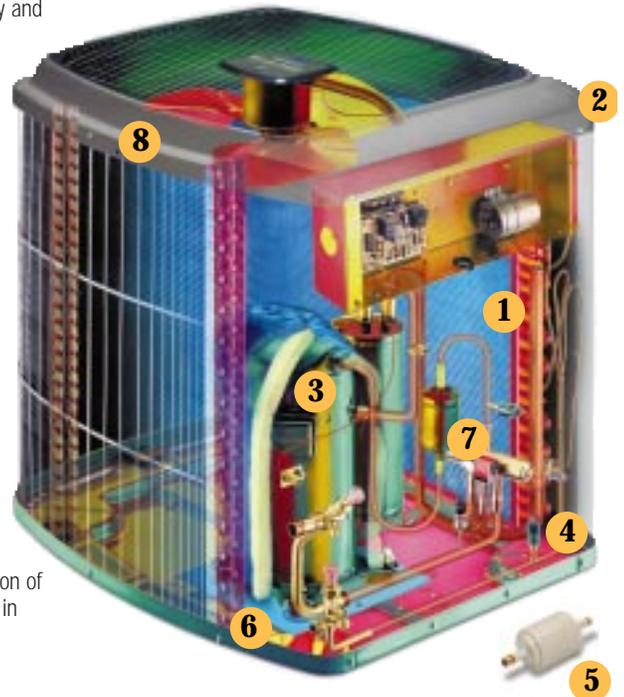

Designed for added efficiency, the WeatherMaker 38YXA uses Puron, an environmentally sound refrigerant that enhances energy savings through improved heat transfer. When combined with our variable speed indoor unit designed specifically for use in systems with Puron refrigerant, the WeatherMaker 38YXA delivers up to 14.5 SEER (Seasonal Energy Efficiency Ratio) and 8.5 HSPF (Heating Seasonal Performance Factor). These outstanding ratings exceed the EPA Energy Star guidelines for energy-efficient performance, making this heat pump an excellent choice for year round comfort and energy savings.

efficiency

With Carrier's WeatherMaker 38YXA, you can count on premium performance. Carrier's exclusive Silencer System ensures quiet performance and energy efficiency. Each component of the WeatherMaker 38YXA is designed to provide optimum efficiency, comfort and reliability. And, for even greater comfort and energy savings, ask your Indoor Weather Expert about a matching indoor coil. A properly matched fan coil can provide precision airflow, improved humidity control and greater efficiency throughout every season.

performance

- 1 Environmentally sound Puron refrigerant** provides superior heat transfer for added efficiency. As the refrigerant of the future, Puron delivers cool comfort and energy savings now and for years to come. And you'll enjoy lower service costs in the future as R-22 and other refrigerants are phased out.
- 2 Quiet, economical performance** is achieved through Carrier's Silencer System. The unique design reduces air turbulence through the unit for enhanced energy efficiency and reduced sound levels.
- 3 Reliable performance** of the scroll compressor is ensured by an extra-thick shell. This shell protects the life of your heat pump as it provides energy-efficient indoor weather year after year.
- 4 Dependable operation** is ensured by the high and low pressure switches that protect the compressor from extreme conditions.
- 5 Improved reliability** is provided by the filter drier which prevents the formation of acids that cause corrosion in the system.
- 6 Reduced outdoor sound** is the result of our compressor vibration isolator plate. Preventing vibration from transmitting into the base pan minimizes operational sound.
- 7 Reduced indoor sound** is yours as the discharge muffler reduces refrigerant pulsation sounds for quiet heat pump operation.
- 8 Weather-resistant cabinet** maintains the clean appearance of your outdoor cabinet, with a tough corrosion and scratch-resistant finish and ceramic-coated screws prevent rust streaks.

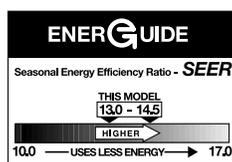

As an ENERGY STAR Partner™ Carrier Corporation has determined that this product meets the ENERGY STAR guidelines for energy efficiency.

## WARRANTY

Carrier ensures your indoor weather by providing written product and component warranties. The scroll compressor is protected by a ten-year limited warranty. The entire unit is protected by a one-year limited warranty. Extended warranties are also available. Ask your Indoor Weather Expert for details.
