Silicon Graphics' Interactive Technologies Unveiled With Time Warner Cable's Full Service Network

---

FSN System Software and Interface, CHALLENGE Media Servers and Set–Top Technology Deployed in Powerful Interactive Television System

On December 14, 1994 Silicon Graphics, Inc. unveiled an array of interactive technologies as part of the debut of Time Warner Cable's Full Service Network(tm)(FSN). The FSN features the most advanced solution ever deployed for interactive television services, and is the first ever to deliver fully functional, truly interactive applications to cable television subscribers.
