Data – Landsat Image @ 30m + DEM model @ 100m

Applications – Business, Education and Scientific visualization

- Enjoy a high altitude fly-by of your city, state, country or Mars.
- Analyze business competition by showing the relation between population density, the location of competitors and competitor's profit.
- Animation of weather formations, e.g. thunderstorms, on realistic back ground.
- Demonstrate the effect of geographic feature on weather and ocean current.
- Analyze the relationship between pollution and population density.
