Dr. Pieter Hartel,
Department of Computer Systems,
University of Amsterdam,
Kruislaan 403, 1098 SJ Amsterdam, The Netherlands

Dear Pieter,

I'm enclosing my comments on the paper "Comparing Id and Haskell in a Monte Carlo Photon Transport Code" by Jeffrey Hammes, Olaf Lubeck, Wim Boehm.

I think the paper is reasonably well written, and that it's an interesting thing to try, and a modified version of the paper ought to be acceptable.

(I have a feeling that a lot of their work on the Id code isn't about functional programming, as such, but I'm not sure what can be done about that).

Yours sincerely,
