Publications of the Syracuse University Computational Physics Group

1. C.F. Baillie and P.D. Coddington, *Comparison of Cluster Algorithms for 2-D Potts Models*, Phys. Rev. **B 43**, 10617 (1991). SCCS-12.

2. J. Apostolakis, C. Baillie and G.C. Fox, *Investigation of the 2d O(3) Model Using the Overrelaxation Algorithm*, Phys. Rev. **D 43**, 2687 (1991). SCCS-65.

3. J. Apostolakis, C. Baillie and G.C. Fox, *The 2d O(3) Model by Overrelaxation*, Proc. of the International Conference on Lattice Field Theory, Tallahassee (October 1990), Nucl. Phys. B (Proc. Suppl.) **20**, 678 (1991). SCCS-101.

4. P.D. Coddington and C.F. Baillie, *Parallel Cluster Algorithms*, Proc. of the International Conference on Lattice Field Theory, Tallahassee (October 1990), Nucl. Phys. B (Proc. Suppl.) **20**, 76 (1991). SCCS-102.

5. J. Apostolakis, P. Coddington and E. Marinari, *A Multi-Grid Cluster Labeling Scheme*, Europhys. Lett. **17**, 189 (1992). SCCS-103.

6. A.A. Middleton, *Thermal Rounding of the Charge Density Wave Depinning Transition*, Phys. Rev. Lett. **45**, 9465 (1992). SCCS-108.

7. P.D. Coddington and C.F. Baillie, *Empirical relations between static and dynamic exponents for Ising model cluster algorithms*, Phys. Rev. Lett. **68**, 962 (1992). SCCS-141.

8. D.J. Edelsohn, *Hierarchical Tree-Structures as Adaptive Meshes*, to be published in Int. J. Mod. Phys. C. SCCS-193.

9. A.A. Middleton, O. Biham, P.B. Littlewood and P. Sibani, *Complete Mode Locking in Models of Charge Density Waves*, Phys. Rev. Lett. **68**, 1586 (1992). SCCS-217.

10. P.D. Coddington and C.F. Baillie, *Dynamical Exponents for Potts Model Cluster Algorithms*, Proc. of the International Conference on Lattice Field Theory, Tsukuba, Japan (November 1991), Nucl. Phys. B (Proc. Suppl.) **26**, 632 (1992). SCCS-220.

11. E. Marinari and G. Parisi, *Simulated Tempering: A New Monte Carlo Scheme*, Europhys. Lett. **19**, 451 (1992). SCCS-241.

12. G. Iori, E. Marinari, G. Parisi and M.V. Struglia, *Statistical Mechanics of Heteropolymer Folding*, Physica **A185**, 98 (1992).

13. M. Guagnelli, M.P. Lombardo, E. Marinari, G. Parisi and G. Salina, *The Quenched Mass Spectrum in Lattice QCD*, Proc. of the International Conference on Lattice Field Theory, Tsukuba, Japan (November 1991), Nucl. Phys. **B** (Proc. Suppl.) **26**, 278 (1992).

14. M. Guagnelli, M.P. Lombardo, E. Marinari, G. Parisi and G. Salina, *The Quenched Mass Spectrum in Lattice QCD on a 1 Gigaflops Computer*, Nucl. Phys. **B378**, 616 (1992).

15. E. Marinari, A. Middleton, *Statistical Mechanics on Massively Parallel Computers: The Research at NPAC*, Parallel Computing News **5**, 21 (1992). SCCS-452.

16. T. Haupt, *Visualization of High Energy Physics Data Using AVS*. SCCS-243.

17. A. Pertsov, M. Vinson, and S. Müller, *Three-dimensional reconstruction of organizing centers in excitable chemical media*, Physica D **63**, 233 (1993). SCCS-247.

18. E. Marinari *et al.*, *The APE-100 Computer: The Architecture*, International Journal of High Speed Computing, to appear. SCCS-268.

19. M. Bowick and E. Marinari, *Quantum Gravity, Random Geometry and Critical Phenomena*, Gen. Rel. Grav. **24**, 1209 (1992), (Fourth Award in the Gravity Research Foundation Essay Competition 1992). SCCS-269, SU-4241-505.

20. J. Apostolakis, P. Coddington and E. Marinari, *New SIMD Algorithms for Cluster Labeling on Parallel Computers*, Int. J. Mod. Phys. C **4**, 749 (1993). SCCS-279.

21. M. Guagnelli, E. Marinari and G. Parisi, *Mean Field Solutions of the Random Field Ising Model*, J. Phys. A (Math. Gen.), to appear. SCCS-329.

22. P. Pliszka and E. Marinari, *On Heteropolymer Shape Dynamics*, Europhysics Lett. **22**, 167 (1993). SCCS-330.

23. G. Iori, E. Marinari and G. Parisi, *Non-Exponential Relaxation Time Scales in Disordered Systems: an Application to Protein Dynamics*, submitted to J. Phys. A. (Math. Gen.) SCCS-331, ROM2F-92-35.

24. M. Dong, M.C. Marchetti, A.A. Middleton and V. Vinokur, *Elastic String in a Random Potential*, Phys. Rev. Lett. **70**, 662 (1993). SCCS-346.

25. D.S. Fisher and A.A. Middleton, *Critical Behavior of Charge Density Waves Below Threshold: Numerical and Scaling Analysis*, Phys. Rev. B. **47**, 3530 (1993). SCCS-347.

26. O. Biham, A.A. Middleton, and D. Levine, *Self-Organization and a Dynamical Transition in Traffic Flow Models*, Phys. Rev. **A 46**, R6124 (1992). SCCS-348.

27. M. Bowick, P. Coddington, L. Han, G. Harris and E. Marinari, *The Phase Diagram of Fluid Random Surfaces with Extrinsic Curvature*, Nucl. Phys. B **394**, 791 (1993). SCCS-357, SU-HEP-4241-517.

28. B. Brügmann, *Non-uniform Measure in 4d Simplicial Quantum Gravity*, Phys. Rev. D **47**, 3330 (1992). SU-GP-92/9-1.

29. B. Brügmann and E. Marinari, *4D Simplicial Quantum Gravity with a Nontrivial Measure*, Phys. Rev. Lett. **70**, 1908 (1993). SCCS-361, SU-GP-92/9-2.

30. M.L. Paciello, E. Marinari, G. Parisi and B. Taglienti, *The String Tension in Gauge Theories: a Suggestion for a New Measurement Method*, Phys. Lett. **298B**, 400 (1993).

31. O. Biham and M. Kuale, *Unstable Periodic Orbits in the Stadium Billiard*, Phys. Rev. **A 46**, 6334 (1992).

32. E. Marinari, M. Guagnelli, and G. Parisi, *Maximal Mean Field Solutions in the Random Field Ising Model: the Pattern of the Symmetry Breaking*, submitted to J. Phys. A. SCCS-372, ROM2F-92-46, cond-mat/9303042.

33. M. Bowick, P. Coddington, L. Han, G. Harris and E. Marinari, *Strings with Extrinsic Curvature: An Analysis of the Crossover Regime*, Proc. of the International Conference on Lattice Field Theory, Amsterdam (October 1992), Nucl. Phys. **B** (Proc. Suppl.) **30**, 795 (1993). SCCS-401, SU-HEP-4241-527.

34. G. Iori, E. Marinari and G. Parisi, *Random self-interacting chains: a mechanism for protein folding*, J. Phys. A (Math. Gen.) **24**, 5349 (1991). SCCS-382.

35. E. Marinari and G. Parisi, *On Polymers with Long Range Repulsive Forces*, Europhys. Lett. **15** (1991) 721.

36. E. Marinari, *A Review Talk about Computers and Theoretical Physics,* Proc. of the International Conference on Lattice Field Theory, Amsterdam (October 1992), Nucl. Phys. **B** (Proc. Suppl.) **30**, 122 (1993). SCCS-383.

37. M. Bowick, B. Brügmann, P. Coddington, L. Han, G. Harris and E. Marinari, *Random Surfaces and Quantum Gravity: Looking for the Emergence of Continuum Theories from Triangulated Manifolds*, Proceedings of the Conference "String Theory, Quantum Gravity and the Unification of the Fundamental Interactions", eds. M. Bianchi, F. Fucito, E. Marinari and A. Sagnotti, (World Scientific, Singapore, 1993). SCCS-387.

38. M. Bowick, P. Coddington, L. Han, G. Harris and E. Marinari, *The Phase Structure of Strings with Extrinsic Curvature*, Proc. of the Workshop "String Quantum Gravity and Physics at the Planck Energy Scale", Erice, Italy (June 1992). SCCS-391, SU-HEP-4241-528.

39. G. Fox, J. Apostolakis, M. Bowick, B. Brügmann, P. Coddington, D. Edelsohn, L. Han, G. Harris, E. Marinari, K. Mills and S. Ranka, *Computer Science Software Tools and Languages to Support Computational Physics*, report to the IBM Corporation. SCCS-393.

40. M. Vinson, A. Pertsov and J. Jalife, *Anchoring of vortex filaments in 3D excitable media*, submitted to Physica D.

41. P. Ensminger and M. Vinson, *Deterministic nonlinear dynamics in Phycomyces sporangiophores*, submitted to Journal of Theoretical Biology.

42. M. Bowick, P. Coddingtion, G. Fox, L. Han, G. Harris, and E. Marinari, *Optimization of a Dynamic Random Surface Program for RISC Processors*, presented at the SIAM 1993 Meeting, Philadelphia, PA (July 1993). SCCS-481.

43. V. Dotsenko, P. Windey, G. Harris, E. Marinari, E. Martinec and M. Picco, *Critical and Topological Properties of Cluster Boundaries in the 3d Ising Model*, Phys. Rev. Lett. **71**, 811 (1993). SCCS-621, SU-HEP-4240-531

44. E. Marinari and G. Parisi, *On Toy Aging*, J. Phys. A (Math. Gen.), to appear.

45. Zheng-Yao Su, Wen Chen and Geoffrey C. Fox, *The Implementations of the Hierarchical Cluster Labeling Algorithm on Parallel Computation Environments*, to appear in Proc. 2nd Int. Conf. on Computational Physics, Beijing (1993).

46. O. Biham, L.W. Chen and G. Vidali, *Models for monolayers adsorbed on a square substrate*, Surface Science **287**, 815 (1993).

47. W. Li, G. Vidali and O. Biham, *Scaling of island growth in Pb overlayers on Cu(001)*, Phys. Rev. B, to appear.

48. G. Barkema, O. Biham, M. Breeman, D.O. Boerma and G. Vidali, *Characterization of submonolayer growth of Cu Islands on Cu(001)*, submitted to Phys. Rev. Lett.

49. G. Vidali, O. Biham, H. Zeng, J.S. Lin and W. Li, *Scaling in the growth of Pb islands on Cu(001)*, Proc. of the 4th Int. Conf. on the Structure of Surfaces, to appear (1993).

50. P.D. Coddington, *An Analysis of Distributed Computing Software and Hardware for Applications in Computational Physics*, to be published in the Proceedings of the Second International Symposium on High Performance Distributed Computing, Spokane, WA (July 1993). SCCS-421.

51. G.C. Fox and P.D. Coddington, *An Overview of High Performance Computing for the Physical Sciences*, to be published in the Proceedings of the Mardi Gras Conference on High Performance Computing and Its Applications in the Physical Sciences, Baton Rouge, LA (February 1993), ed. D.A. Browne *et al.*, (World Scientific, Singapore, 1994). SCCS-488.

52. K. Anagnostopoulos, M. Bowick, P. Coddington, M. Falcioni, L. Han, G. Harris and E. Marinari, *Fluid Random Surfaces with Extrinsic Curvature: II*, Phys. Lett. B **317**, 102 (1993). SCCS-511, SU-HEP-93-4241-540.

53. J. Apostolakis, *Asymptotic scaling in the two-dimensional nonlinear Sigma model: A Monte Carlo study on parallel computers*, Ph.D. thesis. SCCS-514.

54. Z.-Y. Su, *The Hierarchical Algorithms – Theory and Applications*, Ph.D. thesis. SCCS-524.

55. P.D. Coddington, *Analysis of Random Number Generators Using Monte Carlo Simulation*, Int. J. Mod. Phys. C **5**, 547 (1994). SCCS-526.

56. P.D. Coddington and L. Han, *Generalized Cluster Algorithms for Frustrated Spin Models*, Phys. Rev. B. **50**, 3058 (1994). SCCS-527.

57. P.D. Coddington and L. Han, *A Generalized Cluster Algorithm for the 3-d Fully Frustrated Ising Model*, to be submitted to Phys. Rev. B. SCCS-528.

58. E. Marinari, G. Parisi and F. Ritort, *On the 3d Spin Glass*, J. Phys. A (Math. Gen.), to appear. SCCS-532.

59. M. Bowick, M. Falcioni, G. Harris and E. Marinari, *Two Ising Models Coupled to 2–Dimensional Gravity*, Phys. Lett. B, to appear. SCCS-540, SU-HEP-93-4241-556.

60. G. Harris, *Percolation on Strings and the Cover-up of the $c = 1$ Disaster*, SU-HEP-4241-555.

61. M. Bowick, M. Falcioni, G. Harris and E. Marinari, *Critical Slowing Down of Cluster Algorithms for Ising Models Coupled to 2-d Gravity*, Phys. Lett. B **322**, 316 (1994). SCCS-568, SU-HEP-4241-560.

62. S.-J. Bae, S.H. Ko and P.D. Coddington, *Parallel Wolff Cluster Algorithms*, submitted to Int. J. Mod. Phys. C. SCCS-619.

63. M. Bowick, G. Harris, M. Falcioni and E. Marinari, *Multiple Ising Models Coupled to 2-d Gravity: A CSD Analysis*, Proc. of the International Conference on Lattice Field Theory, Dallas (Oct. 1993).

64. G.C. Fox and P. D. Coddington, *Parallel Computers and Complex Systems*, in T. Bossomaier and D. G. Green, editors, *Complex Systems*, (Cambridge University Press, Cambridge, in press).
